PART 3

Needs work

Is your website working?

Your website opens. But 2 things are hurting it.

Start with the first item below. Step 1 (website) is under ‘Do this first’.

We could not check how fast it opens.

We opened your website on 1 Oct 2026.

Your Google listing links to your website.

First screen on a phone

We could not check how fast it opens.

What is hurting it

1. **Your outlet's page gives only a brief location description, not the full street address shown in your Google listing.**
   A customer may not be able to identify the exact building or reach the right entrance from this description.
   Add the full street address from your Google listing to your outlet's page, including the building name, street/locality and PIN code.

2. **Your outlet's page does not show the outlet phone number that appears on your Google listing.**
   Customers who want to call this outlet before visiting cannot use the phone number from your Google listing on your outlet's page.
   Add the outlet phone number from your Google listing to the Hyderabad location details as a tap-to-call link.

These work

- No "Not secure" warning
- A layout for phones
- A page title

About this check

We checked 10 things on 1 Oct 2026. We used only facts anyone can see.

We could not check: Instagram, JustDial, Magicpin, Nearbuy, Offers of the businesses near you. Some sites stop us from reading them. It is not a sign of a problem.

Where our information comes from: Google, and the web page of each place we could read; Google Maps listings, from Google; Your website; Google Maps, through a data company we pay; Google search results, through a data company we pay; ChatGPT, Gemini and Claude, asked by us; Google reviews, through a data company we pay.

This check is about this address only. It is not about your other shops. This check shows how your business looks from outside. It does not show your sales, your costs or how many people walk in. AI answers come from AI tools. They do not come from people. Use it to see what to fix first. It is not a promise of what will happen.

This is a sample check of another business. Names are changed. The businesses marked with letters are the ones we compared. Numbered businesses are others that Google or AI apps showed. The search words are examples.
